

# HAMLET and BAMLET

## Both Kill Tumor Cells Without Killing Healthy Cells or the Immune System

HAMLET means Human Alpha-lactalbumin Made Lethal to Tumor cells. A component of human “Mother’s Milk”, it triggers the death of tumor cells. This [research](#) was published Feb 11, 2006 in PubMed.gov US National Library of Medicine National Institute of Health but it never made the evening news. (Thank you Sweden for initiating this profound study! C.Svanborg Institute of Laboratory Medicine, Dept of Microbiology, Immunology & Glycobiology, Lund University 221 00 Lund, Sweden).

BAMLET means Bovine Alpha-lactalbumin and Oleic Acid. It behaves identical to HAMLET, but only when derived from pasture-raised raw cow’s milk. BAMLET activates a lysosomal cell death program in cancer cells and kills tumor cells via a mechanism involving lysosomal membrane permeabilization, and has potent cytotoxic activity against eight cancer cell lines that were tested. This [research](#) was published Jan 9, 2010 in PubMed.gov US National Library of Medicine National Institute of Health but it was too boring for nation press. (Thank you Denmark! P.Rammer Apoptosis Dept & Centre for Genotoxic Stress Response, Institute for Cancer Biology, Danish Cancer Society, Copenhagen, Denmark).

Long before science uncovered HAMLET and BAMLET, Dr. Johanna Budwig (Cancer Researcher and 7-Time Nobel Prize Nominee) successfully treated her patients with raw milk Quark Cheese plus Organic Cold-Pressed Flaxseed Oil ([Budwig Cancer Treatment Protocol](#)). In 1929 Dr. J.R. Crewe began the “[Raw Milk Cure](#)” study on the premiss “the body eliminates (detoxes) and healthy new blood is restored so disease is eliminated”. The 16 year study and sanitarium were funded by the Mayo Foundation (Mayo Clinic) which concluded “Raw milk and sound blood differ in nothing but color: milk is blood”, which became every doctor’s mantra. Hippocrates and Galen prescribed raw milk for medicinal benefits; see [here](#) and over [here](#), and one more [here](#). Raw milk [heals](#) the body, [imitation](#) milk creates illness in the body and no wonder it is the most allergic food on the planet.
